

SolarEdge Product Waiver Approval

Issue date: November 10, 2025

Dear installer,

Upon examining your waiver request, SolarEdge decided to approve it under the following conditions:

1. This approval is limited to installations done in Europe, Israel, and APAC only.
2. The approved designs are as follows:
 - (1) The connection of S650A Power Optimizers with PV modules up to 650W, Voc up to 80V, and Isc up to 16.5A. **Continuous current during operation is limited to 15A.**
 - (2) The approved inverters are the **SolarEdge Home Hub Inverter – Three Phase only.**
3. The rest of the installation guidelines and the Power Optimizer's performance remain as stated in the SolarEdge specifications and installation documents.

SolarEdge confirms that the designs mentioned above, though exceeding the Power Optimizer maximum short circuit current (Isc) of the connected PV module (16.5A vs. 15A), will not void the Power Optimizer or Inverter warranty.

The sites must be connected to SolarEdge Monitoring.
